

Dear Vasolkas,

Well the system works, but not without a few programming bugs. But it was very exciting to hear it for the 1st time ~~time~~ after a year of conception. It does need to grow from its present state, to one which is more interactive and easier to define parameters.

I am teaching a class this winter at Film in the Cities on computer graphics. I hope to get a Bally and/or an Apple for the class.

Energy is picking up as the "season" gets into full swing. I've started to sit in on Andy Rosen's IP class & have talked to him about putting it together w/ my interface to control the IP.

The job I have is excellent for doing my own work. It's a CETA to record audio for a videotape ala Robbe-Grillet. I was started on the payroll Oct 1st & shooting doesn't start until Jan. 15, so I get paid but just to my own work!

I have a small budget to rent tapes and would like to rent and see(!) images you are producing on the computer. The class starts Jan. 5 so there is lots of time and will contact you again about it.

I am hoping that during this winter I can accumulate 16 speakers & amps & hit the road w/ this system.

A tape will be on its way in the near future.

Hope to hear/see you soon.

Paul Paul

P.S. May the winter here will provide an excuse to visit.

Stay Well!

Dear U's,

What a disaster! I'm glad you were unharmed.

Buffalo never lets you go scot free!

Life in Minneapolis is settling down to be quite dull & boring.

Unlike the east where you might meet someone and have this instant recognition, that doesn't happen here.

So I swim in the morning at a beautiful lake and spend most the afternoon & night programming. I coming quite comfortable Pushing & Popping. Now I have some routines down that I can call "so I can start composing sound now!" Finally!

So soon there will be tapes. I might do a performance at the landmark Center in early November. At this place (old Courthouse) the lobby is four stories high and has balconies on each floor which run all around the perimeter of the room. So I think I will set up four quad spaces. 4 speakers on each floor. It will be great to have the Kennedy assassination in an old courthouse.

I think I once mentioned to you that my parents were thinking of moving to

Santa Fe. They might go out there
for a visit in a couple of weeks &
I gave them your phone #. These
good folks with a good perspective.

I gave my class a "Binary
literacy" rap inspired by you of
course in which I stated your revolution
against the camera obscura. ~~I told them~~
~~what faced with ~~it~~ why to move~~
towards full unemployment & away from
full employment. When computers put people
out of work not to resent & smash the
computers but to smash old doctrines & ideas
The class thought I was nuts & just looked
bored. Binary illiterates!

Oh well.

Hope to see you soon.

love,
